

FAVOUR WILLIAMS

Flutter Mobile Developer

hello.williamsfav@gmail.com | +234 9039982852 | Lagos, Nigeria

linkedin.com/in/favour-willli | github.com/hello-favour

PROFESSIONAL SUMMARY

Experienced Flutter Mobile Developer with 4+ years of professional mobile development experience. Proven expertise shipping production-ready applications to both Google Play Store and Apple App Store. Specializes in building cross-platform native-feeling Flutter apps with scalable state management, seamless API integration, and pixel-accurate responsive UI. Strong collaborator experienced working with product, design, and backend teams to deliver high-quality mobile experiences.

CORE COMPETENCIES

Mobile Platforms: Flutter, iOS, Android, Cross-platform Development, Native Integration

Languages: Dart, JavaScript, TypeScript, Node.js

State Management: Riverpod, GetX, Provider, Bloc/Cubit patterns

Backend & APIs: REST APIs, GraphQL, Firebase Auth, Firestore, Firebase Messaging, MQTT, WebSocket

Mobile Expertise: Widget lifecycle, Rendering pipeline, Performance optimization, Responsive layouts, Accessibility, Deep linking, Push notifications

App Deployment: Google Play Store, Apple App Store, Code signing, App submission processes

Dev Tools: Git, GitHub, Android Studio, VS Code, Firebase, Figma, Jira

PROFESSIONAL EXPERIENCE

Mobile Developer

Appiawave Technology | South Africa (Remote) | Apr 2024 – Present

- Built production-ready Flutter interfaces for e-hailing mobile applications deployed to Google Play Store and Apple App Store
- Implemented real-time features using MQTT for live updates and Firebase for chat functionality
- Collaborated daily with backend developers on API integration, architecture decisions, and shared business logic
- Optimized mobile performance across iOS and Android platforms, addressing startup time and frame rate targets
- Participated in code reviews and QA triage, contributing to healthy engineering culture

Flutter Developer

Techblend | Nigeria (Onsite) | Aug 2023 – Apr 2024

- Developed and architected the Flutter frontend of PAYBLEND, a financial app with daily finance tools and workflows
- Led frontend architecture decisions that significantly improved performance, scalability, and user experience
- Coordinated REST API integration with backend teams to ensure reliable product functionality and data flow

- Implemented Provider state management solution, optimizing app responsiveness and data synchronization
- Made critical decisions on app structure to improve maintainability and team velocity

Flutter Developer

Beepo | Lagos (Remote) | Feb 2023 – Aug 2023

- Built and shipped BeepoApp to iOS and Android—a decentralized social platform using blockchain technology
- Integrated Web3Auth and blockchain APIs for decentralized authentication, implementing privacy-focused user flows
- Translated complex design system requirements into pixel-accurate, responsive Flutter UI components
- Participated in code reviews and QA triage, maintaining high code quality standards throughout development
- Worked closely with design team to ensure accessibility and platform-specific conventions

Mobile App Developer

TaskIt Technology Limited | Remote | Feb 2025 · Mar 2026

- Developed ride-sharing e-application and taxi app connecting drivers and passengers using Flutter
- Consumed REST APIs and integrated backend services for real-time ride matching and booking functionality
- Collaborated with backend developers to ensure seamless data flow and API integration
- Implemented responsive mobile UI components for both driver and passenger applications
- Built and tested features for production deployment to iOS and Android platforms

Flutter Developer

Harvoxx Tech Hub | Nigeria (Onsite) | Jan 2025 – Apr 2025

- Built scalable, responsive mobile applications using Flutter widget architecture and lifecycle management
- Integrated REST APIs with clean async operation handling and efficient state management
- Worked closely with design and backend teams to deliver optimized UI and seamless API integration
- Raised technical flags proactively on scope creep and integration challenges, proposing solutions early
- Supported QA and participated in bug triage during testing phases

FEATURED PROJECTS

PAYBLEND | *Flutter, Provider, REST APIs | 2023 – 2024*

Financial mobile app integrating daily finance tools and workflows. Architected frontend with complex workflows, responsive layouts, and optimized state management. Achieved high performance through thoughtful UX decisions.

BeepoApp | *Flutter, Web3Auth, Blockchain APIs | 2023*

Decentralized social media platform for iOS and Android. Shipped to both app stores with Web3 authentication and privacy-focused user flows. Built responsive UI supporting both platforms.

E-hailing Mobile Applications | *Flutter, MQTT, Firebase, WebSocket, REST APIs | 2024 · Present*

Production-ready e-hailing applications with real-time updates, WebSocket communication, and chat. Built Flutter interface and WebSocket integration and Firebase chat. Deployed to both app stores with optimized performance.

EDUCATION

ADDITIONAL STRENGTHS

- ✓ Strong communicator who keeps teammates in the loop without needing to be chased
- ✓ Collaborative and ego-free approach to joining and contributing to existing teams
- ✓ Detail-oriented about UX—notice when transitions feel off or touch targets are too small
- ✓ Honest about timelines—surface blockers early and propose solutions
- ✓ Committed to quality—test own work before handing it over
- ✓ Proficient with Git in collaborative multi-developer environments
