PROFESSIONAL SUMMARY

Flutter Mobile Developer with 4+ years of professional experience building and shipping production-ready mobile applications for Android and iOS. Strong in scalable Flutter architecture, state management, REST API integration, real-time features, app store deployment, and pixel-accurate responsive UI. Trusted collaborator across product, design, backend, QA, and business teams.

CORE COMPETENCIES

Mobile:	Flutter, Dart, iOS, Android, Native Integration	State:	Riverpod, GetX, Provider, Bloc/Cubit Patterns
Backend:	REST APIs, GraphQL, Firebase, Firestore, MQTT	Expertise:	Performance, Deep Links, Push Notifications, Accessibility
Deployment:	Google Play Store, Apple App Store, Code Signing	Tools:	Git, GitHub, Android Studio, VS Code, Figma, Jira

PROFESSIONAL EXPERIENCE

Mobile Developer - Appiawave Technology Apr 2024 - Present
South Africa, Remote

- Built production-ready Flutter interfaces for e-hailing mobile applications deployed to Google Play Store and Apple App Store.
- Implemented real-time features using MQTT for live updates and Firebase for chat functionality.
- Collaborated daily with backend developers on API integration, architecture decisions, and shared business logic.
- Optimized mobile performance across iOS and Android, improving startup behavior and frame-rate consistency.
- Participated in code reviews and QA triage, contributing to a healthy engineering culture.

Mobile App Developer - TaskIt Technology Limited Feb 2025 - Mar 2025
Remote

- Developed ride-sharing and taxi applications connecting drivers and passengers using Flutter.
- Consumed REST APIs and integrated backend services for real-time ride matching and booking flows.
- Implemented responsive mobile UI components for both driver and passenger applications.
- Built and tested features for production deployment to iOS and Android platforms.

Flutter Developer - Harvoxx Tech Hub Jan 2025 - Apr 2025
Nigeria, Onsite

- Built scalable, responsive mobile applications using Flutter widget architecture and lifecycle management.
- Integrated REST APIs with clean async operation handling and efficient state management.
- Worked with design and backend teams to deliver optimized UI and smooth API integration.
- Raised technical flags early on scope creep and integration challenges, helping reduce delivery risk.

Flutter Developer - Techblend Aug 2023 - Apr 2024
Nigeria, Onsite

- Developed and architected the Flutter frontend of PAYBLEND, a financial app with daily finance tools and workflows.
- Led frontend architecture decisions that improved performance, scalability, and user experience.
- Coordinated REST API integration with backend teams to ensure reliable product functionality and data flow.
- Implemented Provider state management, improving app responsiveness and data synchronization.

Flutter Developer - Beepo Feb 2023 - Aug 2023
Lagos, Remote

- Built and shipped BeepoApp to iOS and Android, a decentralized social platform using blockchain technology.
- Integrated Web3Auth and blockchain APIs for decentralized authentication and privacy-focused user flows.
- Translated complex design system requirements into pixel-accurate, responsive Flutter UI components.
- Participated in code reviews and QA triage, maintaining high code quality standards throughout development.

FEATURED PROJECTS

PAYBLEND
Flutter, Provider, REST APIs
Financial mobile app with daily finance tools, complex workflows, responsive layouts, optimized state management, and thoughtful UX decisions.

BeepoApp

Flutter, Web3Auth, Blockchain APIs

Decentralized social media platform for iOS and Android with Web3 authentication, privacy-focused flows, and responsive cross-platform UI.

E-hailing Mobile Applications

Flutter, MQTT, Firebase, REST APIs

Driver and rider apps with real-time updates, chat, booking flows, API integration, and production deployment support.

EDUCATION

Self-directed Mobile Engineering Track - Flutter, Dart, app architecture, production deployment, and API-driven mobile systems.
